## Project Description

### Project Objectives

- Analyze and present the data on course revenue.
- Understand where opportunities to increase revenue may lie and track the performance of courses.
- Test if we can safely increase charge on Web Development courses

### Data Source

The data for this project was sourced from Educative for educational purposes. Educative is a massive online open course (MOOC) platform that offers both free and paid courses with a focus on tech courses. This dataset contains 3676 records of courses from 4 subjects (Business Finance, Graphic Design, Musical Instruments and Web Development) taken from Educative.

### Data Structure

- course\_id - Course ID
- course\_title - Course Title
- subject – subject under which course is
- url - Course URL
- publish\_date – day of week , full date on which course was published
- publish\_time – time of day course was published
- price - Course Price
- num\_subscribers - Number of subscribers
- revenue – revenue course generated
- num\_reviews - Number of reviews
- num\_lectures - Number of lectures
- level - Course difficulty
- rating – rating of course
- content\_duration - Duration of all course materials

# Design

## Data Cleaning

- Duplicates within the data set were removed.
- Blank cells were removed
- Subject titles were formatted to be consistent throughout the data

## Data Transformation

- Date Timestamp was split into 2 columns, creating a date column and a time column.
- Pivot tables were created in Excel to summarize data and expedite chart creation.
- Bins were created for specific data to facilitate analysis

### Created columns

- Price Band : {free : 0 ; low : less than \$50 ; medium : between \$50 and \$130 ; high : above \$130}
- Free\_or\_paid : {free : \$0 ; paid: not \$0}
- Rate\_band : {low : less than 0.4 ; mid : from 0.4(inclusive) to 0.7; high : 0.7 or higher}

## Visualization Tools

### Pie Chart

Used where a quick glance at proportions answered the question at hand.

### Stacked Column Chart

Used where whole measures broken down by categories needed to be shown.

### Clustered Column Chart

Used where the differences in categories within a measure needed to be shown.

### Clustered Bar Chart

Used where the differences in categories within a measure needed to be shown.

### Table

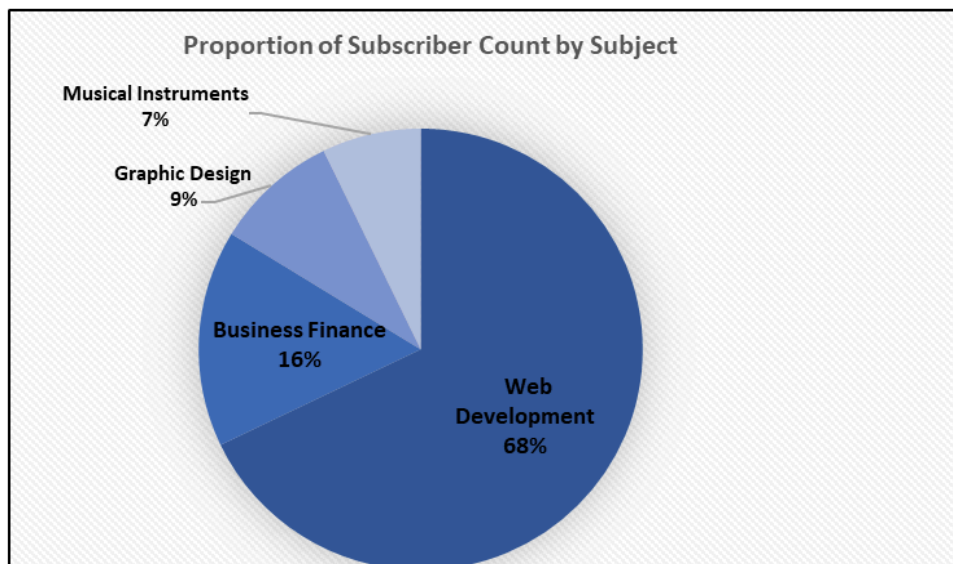

Used where a capture of key measures limited by filters were needed.

### Area Chart

Used where progression over time needed to be shown

## Findings

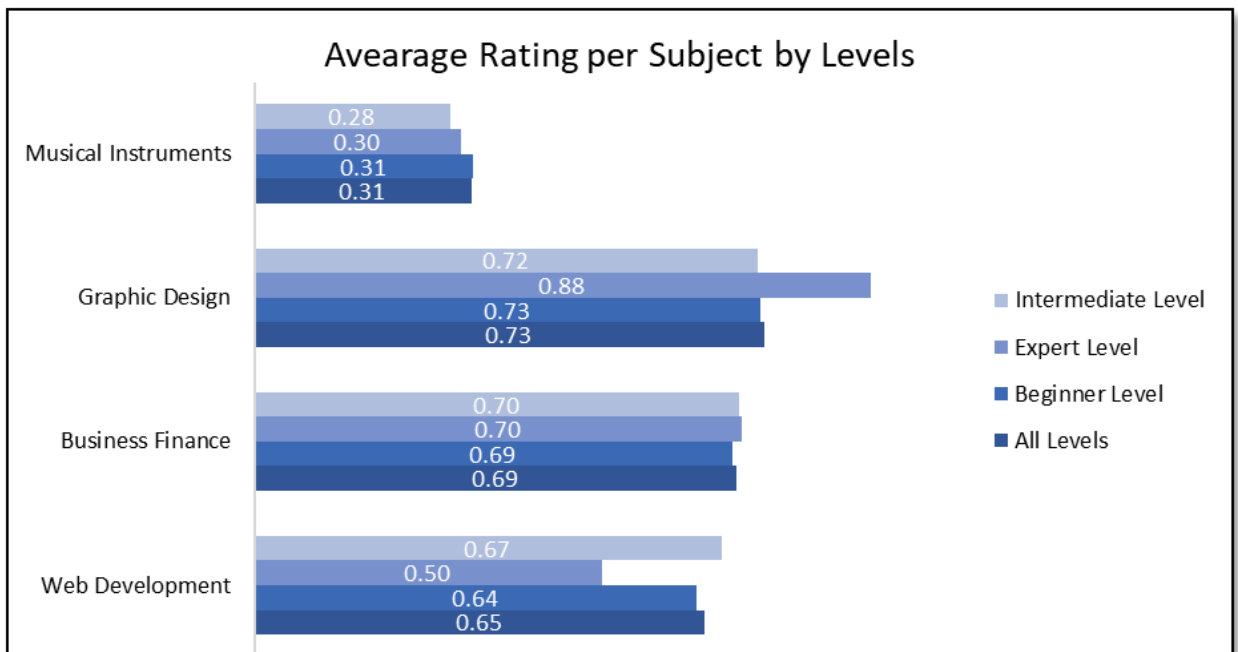

- **Web development** consistently had the most subscribers over the period despite Educative having published about as many courses in **Business finance**. It appears most of our subscribers come to us for tech courses which aligns with our mission.

- Average price of a web development course is relatively high regardless of difficulty level. Subscribers were willing to pay more for these courses.

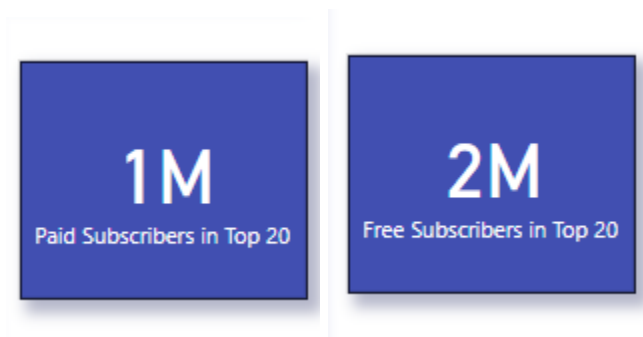

- **Graphic design** courses received the highest ratings regardless of difficulty level especially the **Expert level courses** though said courses cost the least on average.

- Far more people subscribed to paid courses than to free courses.

- Interestingly, within our top 20 courses pulling the most subscribers, we saw 2 free subscribers for every paid subscriber, with the highest ranking course being a free course.

| Top 20 Most Subscribed Courses                               |                    |         |          |             |  |
|--|--------------------|---------|----------|-------------|--|
| Course Title   | Level              | Free or | Duration | Published D |  |
| Learn HTML5 Programming From Scratch                         | Beginner Level     | free    | 10.5     | 2/14/2013   |  |
| Coding for Entrepreneurs Basic                               | Expert Level       | free    | 3.5      | 6/9/2013    |  |
| The Web Developer Bootcamp                                   | Beginner Level     | paid    | 43       | 11/2/2015   |  |
| Build Your First Website in 1 Week with HTML5 and CSS3       | All Levels         | free    | 3        | 4/8/2014    |  |
| The Complete Web Developer Course 2.0                        | Beginner Level     | paid    | 30.5     | 3/8/2016    |  |
| Free Beginner Electric Guitar Lessons                        | All Levels         | free    | 4.5      | 6/15/2012   |  |
| Web Design for Web Developers: Build Beautiful Websites!     | All Levels         | free    | 3        | 4/13/2015   |  |
| Learn Javascript & JQuery From Scratch                       | All Levels         | paid    | 2        | 10/10/2013  |  |
| Practical PHP: Master the Basics and Code Dynamic Websites   | Intermediate Level | free    | 6.5      | 7/19/2014   |  |
| JavaScript: Understanding the Weird Parts                    | All Levels         | paid    | 11.5     | 3/12/2015   |  |
| Pianoforall - Incredible New Way To Learn Piano & Keyboard   | Beginner Level     | paid    | 30       | 8/7/2014    |  |
| Angular 4 (formerly Angular 2) - The Complete Guide          | Beginner Level     | paid    | 22       | 2/11/2016   |  |
| Beginner Photoshop to HTML5 and CSS3                         | All Levels         | free    | 2        | 7/27/2012   |  |
| Web Development By Doing: HTML / CSS From Scratch            | All Levels         | free    | 1        | 9/25/2013   |  |
| HTML and CSS for Beginners - Build a Website & Launch ONLINE | All Levels         | free    | 6        | 3/19/2015   |  |
| Become a Web Developer from Scratch                          | All Levels         | paid    | 27.5     | 11/19/2011  |  |
| Bitcoin or How I Learned to Stop Worrying and Love Crypto    | All Levels         | free    | 8        | 4/20/2013   |  |
| Quickstart AngularJS   | Beginner Level     | free    | 1.5      | 11/22/2014  |  |
| Learn Responsive Web Development from Scratch                | All Levels         | free    | 4.5      | 12/9/2013   |  |
| Learn and Understand AngularJS                               | Beginner Level     | paid    | 7        | 9/24/2014   |  |

- Far more subscribers purchased web development courses that were **highly priced** than **lowly priced**.

- Subscribers appeared to be gravitating towards **beginner level courses** with the advent of many tech job opportunities.

- Few courses have been categorized as **Expert Level**.

## Conclusion

- Educative can look at publishing more Graphic design courses and charging higher for the **Expert Level Courses Graphic Design** courses as they received the highest ratings on average.
- Educative can look at charging a pittance (to test the waters) for **highly rated** and popular (**highly subscribed**) courses that are currently free.
- Web development courses that are in the **low price band** may be increased to the **medium price band** as we have seen that subscribers are willing to pay more.
- We can **revise the quality** of lowly rated web development courses. These courses are currently pulling substantial revenue, however, improving the quality of these courses will attract even more subscribers and consequently revenue.
- In the near future, we can invest in **Expert Level** courses as many of our users will now be at the skill level to take on such courses.
